FLIR IRW-Series: IR Inspection Windows with PIRma-Lock

- Easy Installation – Only one hole to drill and FLIR's single PIRma-Lock ring nut to tighten; same design as conduit connections that use standard US punch tools
- PIRma-Lock Reliability – Tried and true locknut technology makes FLIR's self-grounding locking ring an IR window first, with teeth that bite tight to the inside of the panel
- Quick Access Hinged Cover – Simple flip-open cover with integrated equipment ID label stays permanently attached so it never gets dropped, mismatched, or lost
- Broadband Transmission – Crystal lens supports short, mid, and longwave IR cameras, visual inspections, and fusion technology; allows FLIR cameras with integrated lamps to capture video documentation

3" IR Window
\$279.00

4" IR Window
\$379.00

5" IR Window
\$599.00
